About

The North East and Android Special Interest Group is an amalgamation of North East Day, Digital Imaging and Android SIGs. It provides the opportunity for members to learn to use the rapidly emerging Android Operating System (OS) and Digital Photography. This group provides information on operating, controlling, and maintaining applications (APPS), on compatible mobile devices such as computer tablets and smartphones. All aspects of both hardware and software are considered with a learning experience based on friendly discussions, presentations, and demonstrations to suit both novice and experienced computer and camera users.
