	John Hollow – 0417 031 164	
	Phil Lew – 0418 567 019 – phil@melbpc.org.au	
Description	<p>Microcontrollers are small cheap computer-chips with measurement or sense inputs (e.g. temperature, door-open) and control outputs (e.g. displays, motor control), i.e. all combinations of analog &amp; digital, inputs &amp; outputs. They need very few other components to function, and are in many products (e.g. cameras, cars, toys).</p>	
	<p>Our group is for people to develop microcontroller projects (including the software-programming) – gadgets for fun and more serious purposes. We make machines, using microcontrollers, and other electronics, to do things. We cater for all levels of knowledge, novice to experienced – users helping users. The Wednesday meeting involves discussion and presentations. The associated Saturday Workshop (below) is informal and hands-on.</p>
