

Windows File Locations

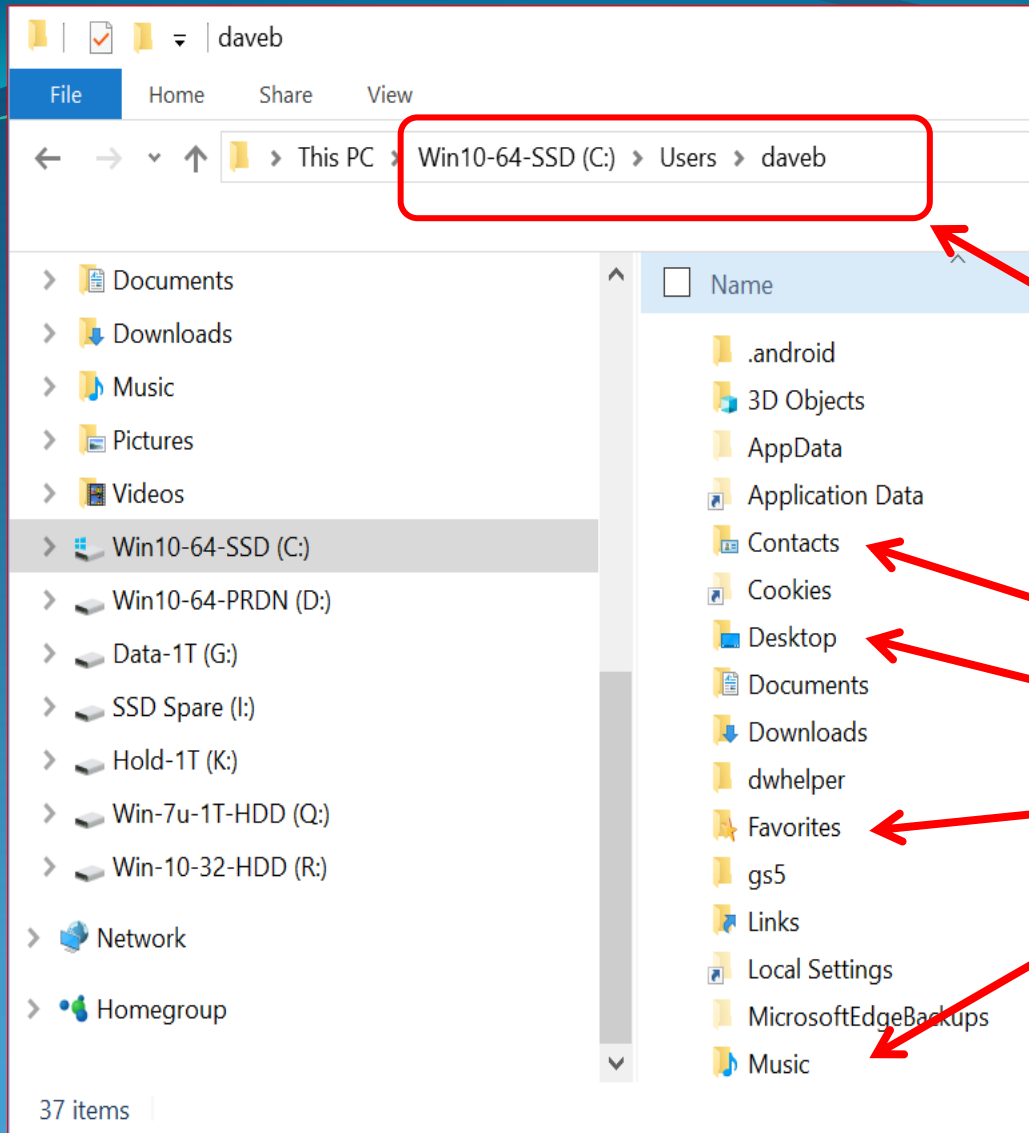

BEAST SIG

MelbPC UG

March-2018

Some History

- Windows XP introduced separate Users
- Vista added separate Desktop, Docs, Pics etc
- Default location - c:\user\ u-nnnn \ etc
- **Sharing needed for Multi User access**
- **Unable to segregate User Data from C: System**
eg. Have data stored in separate partition or HDD, say D:
- **Win-8 provided easy means to shift default files**

User Data

Location

Key directories / files
separate
for each user
