

Data Security

. . . Passwords

Dave Botherway

BEAST SIG

Nov-2019

The 'Passwords' Problem

- Expanding use of PCs for Personal data needing protection
- Most protected by a User ID and a Password
else by recognition - Face, Voice, Finger Print etc
- To beat Hackers, complex and separate passwords needed
- Difficulty remembering IDs and complex Passwords
- Need a Password manager – to generate and store PSWs,
with Multi Device synchronisation

Password Manager – Desired Functions

- Import from existing Browsers (or other PSW Managers)
- PSW generation, with User defined complexity
- Two Factor Authorisation (2FA) – Email or Mobile Phone
- Browser Extensions – for all common browsers
- Record other details – eg. Credit Cards, Bank details
- Folder organisation of PSWs
- Local storage – for offline use
- Multiple devices (Pc, Tablet, Phone) and OS
- Cloud storage – for multi device synchronisation

Password Managers

- Last Pass - free + paid
- Dash Lane – free (only 50 PSWs), else paid
- KeePass - (open source)
- 1Password – no free version, only free trial
- Firefox Lockwise (new browser addition)
- Bitwarden (open source)

The image displays three browser windows illustrating LastPass's functionality. The first window shows the Facebook login page with a LastPass popup displaying a list of saved passwords, including 'Facebook' and 'My Billing Address'. The second window shows the Amazon shipping address page with a LastPass popup displaying saved form fills, such as 'My Mastercard' and 'My Billing Address'. The third window shows the Salesforce 'New Password' page with a LastPass popup displaying a generated password 'd4dx1q!Rb*ii' and options to customize password strength and character sets.

What is KeePass?

Today you need to remember many passwords. You need a password for the Windows network logon, your e-mail account, your website's FTP password, online passwords (like website member account), etc. etc. etc. The list is endless. Also, you should use different passwords for each account. Because if you use only one password everywhere and someone gets this password you have a problem... A

The 1Password you need to remember

With 1Password you only ever need to memorize one password.
All your other passwords and important information are protected by your Master Password, which only you know.

1 Password

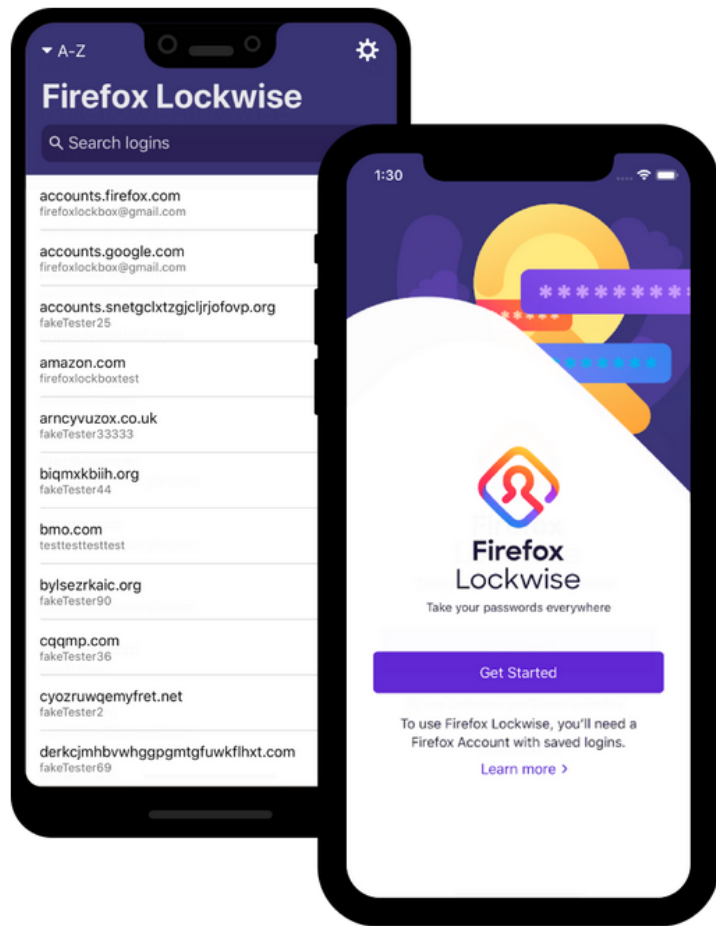

Take your passwords everywhere

Securely access the passwords you've saved in Firefox from anywhere — even outside of the browser.

Try Lockwise now

Bitwarden

CodeinWP Summary

<https://www.codeinwp.com/blog/best-password-manager/>

- If you want the best **free** password manager, you should choose **LastPass** or **Bitwarden**.
- If you want something that's *more* than just a password manager, you should choose **Dashlane**.
- If you want something that's a one-time purchase, you should choose **1Password** 🖱️ **also our overall best password manager in this comparison.**

PSW Manager Summary

- Need to upgrade Password protection
- Seperate and complex PSWs needed
- Management tool needed
- Choose one, anyone – better than none
- Bitwarden seems a great solution
